

AMARILLO TANKS

VALVE BOXES AND METER ENCLOSURES

EXCEPTIONAL CRAFTSMANSHIP, TIME-TESTED DESIGNS

Gain easy access to underground valves and meters, with an Amarillo Tanks enclosure. We offer a large range of sizes (diameter and depth) with ladders, and a variety of lids (with or without hinges) are also available. Our valve and meter enclosures are light, and easy to transport and install. Because they are manufactured out of rolled heavy-gauge corrugated galvanized steel, they are exceptionally strong and long lasting. Although these enclosures are relatively light weight (especially compared to concrete enclosures), the design and material ensure a long service-free life.

WHO NEEDS ONE?

Water well drillers, pipeline companies, mobile homeowners, parks departments, landscapers and more. Anyone who is searching for an economical enclosure alternative to protect valve and meter access. These enclosures need no upkeep and do not need to be heated.

STANDARD OPTIONS

Diameter	Height
2 ft.	2 ft.
3 ft.	3 ft.
4 ft.	4 ft.
5 ft.	5 ft.
6 ft.	6 ft.
